## **New online tool to calculate leave and pay when an employee has a child**

---

Best wishes for 2015 everyone!

The Government has produced a new helpful online [tool](#) for employees when they have a child which calculates (a) their entitlement to maternity, paternity or shared parental leave, and (b) their entitlement to statutory maternity pay, maternity allowance, statutory paternity pay or statutory shared parental pay. Employers can also use it to check their calculations.
